Matrix:

2.) Interconnection Matrix (2 points): For each discovered page from 1 find the pages to which it is connected. The result present in the form of matrix where the first row and the first column represents pages and [i, j] cell has the following values:

- **Y – if page[i] has direct link to page[j]**
- **N - if page[i] does not have direct link to page[j]**

Find the list of keywords connecting those pages.
